Lancaster Farming

VOL. 6 NO. 10 — Lancaster Farming, Saturday, January 28, 1961 — $2 Per Year

HENRY S. MELLOTT, NEWEST MEMBER of the Soil Conservation team in the county gets a briefing on the soils and topography of the county by Martin Muth, Work Unit Conservationist in charge of the local office of the U. S. Department of Agriculture agency. Mellott will work as farm planner for soil and water conservation in the local office. —L. F. PHOTO

Broiler Prices Higher In 1960, Report Shows

Broiler prices last year averaged almost a half cent higher than during 1959, but did not reach the high average price of 1958, Lancaster County poultrymen were told in a report at their annual meeting Monday night at the Poultry Center.

Prices during 1960 averged out to 18 35 cents for broilers as compared with the yearly average of 17 87 for the year previous. The 1958 figure was reported to have been 19.80.

Volume of broilers sold declined from 4,533,460 head in 1959 to 3,819.945 head last year, but the increase in the volume of heavy fowl, leghorn fowl and roasters made up a part of the difference.

Total volume during 1960 was 4,544,388 head compared with 5,099,060 head the year before.

Daniel Good, treasurer, in reporting on the finances of the organization said the original mortgage on the poultry Center has been reduced to $19,000.

Good also reported listing fees during the year brought in $10,278.62, the largest single source of income. Another large source of income was the Saturday Barbecues at the Poultry Center which brought in a total of $6,833.55.

The report listed total receipts of $22,198.18 against disbursments of $21,371.52. Cash balance on hand as of January 1 was $1,684.97.

Five directors were re-elected to three year terms and one new director was elected.

Returned to the board were Daniel K. Good, Columbia R1, a poultry buyer; C. Eugene Cassel, Manheim Feed Dealer; John Longenecker, Elizabethtown hatcheryman and grower; Lewis Mortenson, Wabank Road, Lancaster, and Roy Erb, 118 Kreider Ave., Lancaster, an egg producer. The new director is Glenn G. Herr, owner of a breeding flock at Lancaster R7.

Speaker of the evening was Professor R. W Schlosser, Elizabethtown College.

The program was directed by Mark Myer, president of the assn.

Bedford Countian Fills Local Conservation Post

Henry S. Mellott, formedly of Breezewood. Bedford County began work this week with the Lancaster County Soil Conservation Office.

Mellott, recently released from service in the army, reported for work on Monday. He will assist the office as a soil conservationist on farms requesting such service. His duties will include farm planning for soil and water conservation.

Mellott, after graduation from The Pennsylvania State University in 1958 with a degree in general agriculture, worked for the Soil Conservation Service in Towanda, Bradford County.

He had served in that office for six months, making maps, surveying ponds and diversions, and doing farm planning, before being called to military service.

Upon his discharge, Mellott returned to the SCS and was assigned to the Lancaster County office.

Mellott was reared on a small general farm in Bedford county and graduated from Everett High School. He will take up residence in Lancaster County.

Gerald H. Hess Is Appointed By PSU Extension

An Elizabethtown R3 resident has been appointed to the Pennsylvania State University Extension Service Staff as an assistant County Agent, it was announced this week.

Gerald H Hess, who graduates from PSU today, will serve in Northampton County beginning Feb. 1, according to Extension Service Director, Dr. H. R. Albrecht.

Hess will be associated with County Agent Samuel D. Lewis in the Easton office

Hess, the son of Mr. and Mrs. Paul Hess, is a graduate of Elizabethtown high school. He majored in Animal Husbandry at PSU.

While at the University he was a member of the livestock and meats judging teams and the Block and Bridle Club

He is married to the former Helen Graybill, daughter of Mr. and Mrs. J Homer Graybill, Manheim R4. Mr. and Mrs Hess have a one-month-old daughter.

Roy B. Herr Honored By Poultrymen

Roy B. Herr, Pennsylvania Poultryman of the year in 1959, was honored by The Lancaster County Poultry Association Monday night.

Herr was one of the founders of the association and served as president for 12 years. He was vice president during the first year of operation and moved to the top spot when the organization elected officers for the second year. He has also served as president of Pennsylvania Poultry Federation.

Herr, who operates a White Leghorn breeding farm at Lancaster R7, has been in the poultry business in the county for about 40 years.

During the last 27 years he has served on the board of directors of the Lancaster County Poultry Association Upon his retirement this week, the association presented him with a plaque and a life membership in the group.

Presentation was made by Jay Greider, Mount Joy R1, a member of the board of directors.

ROY B. HERR, LANCASTER R7, shown at the door to his incubator was honored Monday night by the Lancaster County Poultry Association Herr served the association as director for 27 years and was presented a plaque upon his retirement from the board. —L.F. PHOTO

Economist Tells Members Co-Op Reserves Growing

Reserves of $130,000 were added to the holdings of the Interstate Milk Producers' Cooperative last year, members of District 11 were told Thursday at the annual banquet of the group.

Dr. Paul E Hand, Economist from the cooperative's staff, told the 260 members in attendance at the Quarryville Methodist Church, the reserves will be rotated and returned to the members at the end of seven years.

Dr. Hand reported that the number and volume of the bulk hauling contracts negotiated by the cooperative had been expanded during the year. This represents a permanent saving to members, he said

He also commented on the work of Interstate in securing a price increase of 10 cents per hundredweight over the 1960 price through Federal Order 61. The increase will be in effect thru the first nine months with a possible 30 cents increase during the last three months of the year, he said.

In other business, 25-year pins were presented to A. Clyde Kreider, Roy Aument, both of Quarryville R1.

Pen and pencil sets were awarded to the four 4-H members having the highest dairy club project book scores in the area covered by District 11. The youths honored were Paul Trimble, of Quarryville R1, score 97.2; Marilyn Harnish, Quarryville R2, score 96.5; Carol Ann Krantz, New Providence R1, score 92.6, and Lucille Kreider, Quarryville R1, score 96.0.

Gerald Kreider, Quarry-

Dist. Forester John Kitch Is Promoted

John Kitch, Reinholds R1, district forester, was promoted in grade by the Pensylvania Department of Forests and Waters Tuesday.

The promotion was one of 25 in the state's 20 forest districts, Secretary Maurice K. Goddard announced. The program of promotion and transfers throughout the state is planned to assist small woodlot owners to grow trees as a crop, Goddard said.

The program is aimed at increasing timber sales from state forests by 50 per cent.

There were two million acres in state owned forests and 1960 sales were nearly $700,000.

Goddard said the promotions will cost the state nearly $15,000 per year.

Kitch is presently president of the Conestoga Valley Association.

Farm Calendar

Jan. 30—7:30 p m. - County Future Farmers meet at Cocalico High School, in Denver

8 00 p m. - Southern Tractor Club meets at Wenger Implement Company, Buck

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures during the next five days will average about eight degrees below the normal range of 24 at night to 39 in the after noon. Cold weather is expected to continue over the week end with some moderation Monday and a return to colder temperatures again about Tuesday or Wednesday. Precipitation may total about 0.4 inches melted falling mainly as rain or snow Monday or Tuesday.

At Lancaster Yards

Trading Slow But Steady

CATTLE: 2600 compared with 2567 last week. Supply includes 60 percent slaughter steers, 30 percent stockers & feeders Trading slow. Slaughter steers steady. Cows 50 - 1.00 higher. Bulls steady. Stockers and feeders steady.

Load Prime 1165 lb. slaughter steers sold for 30.25, load mixed high-Choice and Prime 175 lbs 29.50, three loads high choice 1041-1175 lbs. brought 29 00-29.10, bulk of the Choice grade slaughter steers 27.00-28.50, Good to low Choice 25.00-27 00, with Standard selling down to 22.-50.

A few lots Good grade heifers 23.75-25 00. Cutter & Utility cows were 16.25-18., Canners and low Cutters 14.-50-16.25, and shelly Canners down to 12.00 Utility and Commercial bulls were 19 50-22.50, Good grade 22.50-25

A load Choice 1068 pound feeder steers sold at 27 50. Few loads and lots Medium and Good 850-950 lb feeder steers made 22-26.50.

CALVES: 500 compared with 511 last week Trading was active. Vealers 2.00 higher. Good and Choice vealers ranged from 28.-34., Choice and Prime 35.-42., few to 43., Standard & low-Good 20.-28., Utility down to 16.00.

HOGS 1300 compared with 1212 last week. Barrows, gilts and sows were strong Trading was moderately active U. S. 1-2 190 230 lb. barrows and gilts sold for 20.00-21.00, no. 1 195-230 lbs. 21-25-22 00, 1-3 190-240 lb. hogs 19.25-20.00, few 19.00, U. S 1-3, mostly 2-3, 300-600 lb sows were 12-15

SEEP. 200, compared with 307 last week. Wooled slaughter lambs were 1.00 higher. Trading active. Good and Choice 75-100 lb. slaughter lambs ranged from 18-20, Choice and Prime 20-21.25, Utility down to 15.00.

Chicago Cattle

Steers Heaviest In Over A Year

CATTLE — Local receipts increased 5 per cent but 12 market total down 10 percent. Percentage slaughter steers increased from 70 to about 75 per cent and heifers down from 17 to 15 percent. Cows accounted for short 5 per cent. Average weight of slaughter steers about like 1184 lb. average last week which was heaviest in over a year. Slaughter heifer supply largely good to high choice.

Good and choice steer yearlings 1100 lbs. down fully steady, other steers choice and below steady, high-choice and prime steers steady to 25 lower. Heifers steady. Cows 25-75 higher. Bulk advance on canners and cutters. Bulls steady. Vealers strong to 2 higher. Stockers and feeders very scarce, steady.

Twenty-five loads prime 1150-1425 lb. steers 29 25 - 29 60. Bulk choice and prime 900-1400 lb. steers 26.25-29. Bulk choice 1000-1350 lb wgts. 26 75-28. Bulk good steers 24-26.25, largely 24.50 up on wgts. 1300 lbs. down

Mixed choice and prime heifers 27.50-28, bulk choice 26 25-27.50. Utility and commercial bulls 18.50-21.

Good and choice vealers at 22-28. Medium and good 550 lb. stock steers 24.25, good and choice 910-950 lb. feeding steers 25.10-25.75.

Spring Lawn Dean Wilee 4267984 owned by J. C. and Jay Garber, Lancaster, produced 14,869 lbs. milk and 602 lbs. butterfat in 342 da. on twice daily milking as a 3-year-old.

Vintage Livestock

Steers Continue Generally Steady

CATTLE: 428, at the January 24 auction at Vintage. Compared with last week's market, slaughter steers gen erally steady except high-choice and prime, these weak with fills on all grades considered. Cows 75-1 higher. Bulls steady.

Several lots choice and prime 900-1100 lb. slaughter steers 29.10 29.50, choice 27-29, good to low-choice 24.-75 - 27, standard down to 23. Few lots choice 800-910 lb. heifers 26 25-27.50.

Cutter and utility cows 16-17.50, canners and low-cutters 14.50-16, shelly canners down to 13. Utility and commercial bulls 19.50-22, good grade up to 24.

CALVES: 297. Prime grade vealers steady. All other classes 1 higher. Good and choice vealers 30-36, choice and prime 36-42, a few up to 44, standard and low-good 22-30, utility down to 19.

HOGS: 45. Few lots barrows and gilts steady. Two lots U.S. no. 2 205-215 lbs 19 50-19.75. Lot mostly no. 3 190 lbs. 18.50, lot 277 lbs. no. 3 15.60.

SHEEP: 0. Nothing to offer.

New Holland

Slaughter Steers Up .25

Compared with last week's market, slaughter steers at the January 26 auction at New Holland were 25 higher. Cows were 1 00 higher and bulls continued steady.

Receipts included 764 head

A few lots of mixed choice and prime 950 to 1300 pound slaughter steers brought 29 to 29.60 with the bulk of the choice grade steers at 27 to 29. Good to low choice were 24.75 to 27, while Standard sold down to 22 50.

Cutter and utility cows were 16-18 with a few to 18 50. Canners and low cutters were 14.50-16. Utility & commercial bulls made 19.50 to 23 with good grade at 22.-50 to 25.

Two lots of medium and low good 601-766 pound stock steers made 23 and 23-35. A lot of choice 866 pound feeder steers brought 27.25.

Calves: 367. Vealers were 2 00 higher with good and choice grades bringing 30 to 37 Choice and prime changed hands at 38 to 45 with a few up to 46.50. Standard & low good made 26 to 30 with utility down to 20.

Dairy cattle at the Jan. 29 auction sold very draggy and $20 to $30 lower. Receipts included 92 cows, 11 bulls and nine heifers.

Fresh cows, Holsteins, $300 - 420, Guernseys - $200-240, others - $200-275. Stock bulls $100-175.

A very light run of horses at the January 23 sale sold at steady prices. The mule market continued to gain some interest. Receipts included 129 head of ponies, horses and mules.

Mules in pairs brought $300 to 550 while single mules sold at $125 to 210 per head Pony mares sold for $95-130 while Geldings brought $70 to $100. Riding horses brought prices of $110 - 190, and driving horses sold at $110-175. Killers were 7½ to 8½ cents

---

Bruk Vil Sue Design Pabst, a registered Holstein owned by Isaac M. Brubaker, Lititz, produced 12,820 lbs milk and 509 lbs. butterfat on twice daily milking as a 4-year-old.

"Subsidies, of one kind or another, are nothing new. For 175 years the farmers of America have been subsidizing the cities. They have raised and educated five young men — have helped supply the cities with leadership and power During many periods of inadequate farm returns, farmers have subsidized the cities with cheap food."

● Delmarva-Geo.

(From page 2)

the week end was 537,000 compared to the 554,000 head last week end.

The Delmarva broiler-feed ratio for the week ending on January 20 was steady for the second consecutive week at 4.0. Broilers averaged 17 79 per pound and mash cost $90.60 per ton.

Oaklea Star Polly, a five-year-old Ayrshire cow owned by Masonic Homes Farm Elizabethtown, has a record of 14,454 lbs. milk and 59[illegible] lbs. butterfat on 2x, 36[illegible] days.

Lanc. Poultry Center

Volume Up, Prices Weak

Volume was up but prices slipped only fractionally at the January 26 auction at the Poultry Center.

Broiler prices ranged from 18 0 to 19.1 on the 76,650 head in 18 lots for an average of 18 5. The previous week's average was 18.79. Only one lot of broilers listed was not sold A bid of 18 3 was refused for a lot of 6,000 White Vantress at nine weeks and two days. One lot of 4,500 broilers was withdrawn before the sale

Four lots of roasters failed to sell at bids of 20.1 to 23 6 A total of six lots of roasters brought 21 0 to 25.1 for the 4,825 head while five lots of pullets sold at prices of 21.5 to 23 1 for the 6,450 head.

The auction sold a total of 87,925 head in 29 lots of the 100,375 head in 34 lots listed

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price

Delmarva - Georgia

Demand Spotty Movement Slow

Delmarva reported light movement and spotty demand for broilers during the 24 hour period ending 10.30 Friday morning. Most processing plants were operating and offerings cleared well.

Prices of 16 4 to 17.9 on 531,000 head at farms were reported during the period.

Estimated slaughter by Delmarva processors during

(Turn to page 2)

Fluid Milk

Production Up Only Slightly

Producton over the New York milkshed tapered off slightly and when compared to last week was unchanged to slightly heavier.

Adverse weather conditions interfered with tank arrivals in the metropolitan areas. Some advance buying by consumers in anticipation of snow storms was credited with an improvement in demand.

Supplies continued ample but not burdensome. Wholesale prices for bottling quality milk in New York continued steady except where the dealers were forced to buy tank lots on the open market Spot prices at New York were $5 20 to $5.35 per 40 quart unit.

FROM WHERE WE STAND -

Is Exercise Out Of Style?

Among the material to come across our desk recently was one piece headlined, "No Longer A Dream". In the first sentence are the words, "Pushbutton farming — Agricultural Automation—is no longer a dream."

In the same mail was an article from a state university describing a "Cow Sitting" service some dairymen, in one of the state's counties have organized

During the same week along came a story about some of the newest developments to come out of the electrical research laboratories. Machines energized by electricity and capable of doing everything from keeping the sidewalks free of snow to massaging the aching back of the young-in-heart-but-not-too-young sport who had so much leisure time he sprained his back in his mad search for recreation, will be on the market shortly.

Almost every day reports of some new and dazzling apparatus comes along to take more physical activity out of living.

We get to wishing someone would invent a machine to take all the reports and sweep them off the desk into the proper receptacle.

But then along comes a story of Sophie Jaffe, a teacher with 25 years' experience who said recently to a teachers' meeting, "We are going overboard these days on the idea that, by giving our children the best and the most, we make them happy, well-rounded individuals. Today's children have television sets in their bedrooms, carry transistor radios to school, and brag about the money they spend . . . What we should do is get through to the parents that their children must be taught at home that they can not have everything they want, that money and material abundance are not the acme of American democracy . . . "

And another piece of literature called, "Rown With Golf Carts". is in somewhat the same vein.

America does the job it takes almost

Human being are born with several organs which seem to have no particular use, it says, and sites the appendix as an example. Then it goes on to say it is interesting to speculate on the idea that some future generations may be born with useless legs.

Now before you get the idea that we are opposed to labor saving devices on the farm, let us hasten to say that we know farming is still hard work and pushbutton farming is still a dream, reports to the contrary notwithstanding.

We believe also that a dairyman is entitled to some time off from the day-in day-out chore of milking and feeding a herd.

We know, too, the farmers of America could not feed our population without mechanical contrivances. Less than ten per cent of the population in 50 per cent of the Russian population to accomplish, and the American farmer does it better.

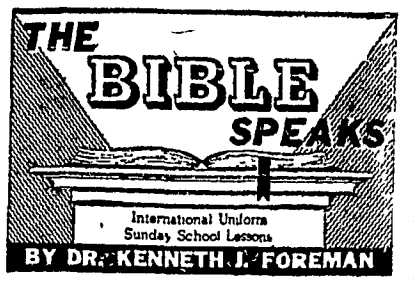
But perhaps that is part of our problem. The trend away from exercise in almost any form, either at work or at play may well be creating a major health problem. In spite of increasing leisure time, Americans are exercising less. Spectator sports are increasing by leaps and bounds over participation sports.

But aside from the health hazard created, lack of exercise causes quite a difference in the food consuming ability of a people.

The rather simple fact is that people who don't use their muscles do not eat as much food as those who do exercise. On a calorie basis, the food intake for people today is only one third to one half what it was in past years. And still Doctors say overweight is one of our national health problems.

Before we lose the use of our legs, and perhaps our arms, backs and our heads too, it might be well for all of us to do some serious thinking about how to make exercise popular again.

At least that's how it looks from where we stand.



Bible Material: John 5.
Devotional Reading: John 8 25-32.

Our Authority

Lesson for January 29, 1961

IT HAS been said that once upon a time the "great man" had authority over others. The modern man who wishes to be great must be an authority on something important. After all, these two are not very different If a man comes to be an authority on something of importance he will be accepted by others interested in the same things he is, as an authority over them, as well as on the subject.

Christ, Our Authority

Dr. Foreman

Jesus Christ is said by St. Paul to be "Head over all things to the church." That is even more true today than when Paul wrote it. There are many churches, or more exactly speaking, many denominations, many types of Christian individuals and groups. All of these claim Christ for their "head," though they may not all express themselves in just that language. This is a phenomenon that calls for investigation. How is it that Christ has retained his authority from the day he headed a small group of fishermen and other village people around Galilee, to this so different day and time, with more than 848,000,000 Christians around the world all looking to Christ as the Number One Authority for their lives?

Christian churches may differ as to the exact way in which the authority of Jesus Christ comes down to us. Some would say it does not come down at all. He lives in each Christian by His Spirit, and each Christian if he listens well may hear the still small voice of Christ's authority in his own heart Others find his authority in the Bible, others in the officers and leaders of a church, in its bishops and other clergy. But it all goes back to Christ How it this?

Jesus' followers have ne claimed that he is the wo leading authority on railroads financial methods for polit campaigns, or flood-control, Chinese music. There was a t when Jesus was considered many people to have superhu knowledge, even perfect kno edge about everything. But church never took this not seriously. What the church d take seriously, and does claim, that our Lord was and is the gre est authority over what is m vital than railroads or polit more urgent than flood cont more fundamental than Chin music. He is our authority o life, because he is an authority it, the authority on it. By life mean in particular and in gene all that is concerned with grows out of human relationsh indeed all that is concerned w and growing out of the relati ship we have to God.

Authority Over Life

Jesus himself, we may be c tain, had won his authority actual living. His graduate deg in life was an earned degree, an honorary one. It was not roll out from a "degree mill," he h actually been through the ha school that Experience keeps may have occurred to you to wo der, sometimes, why the peop took the Sermon on the Mount, a other high teachings of Jesus, quietly as they did. Although h teaching about life is very difficu —more difficult to do than to u derstand—nobody ever said he w talking nonsense. Why didn't the If his teaching was so foolish some critics have thought it wa his friends surely would have se to it that none of it would be e posed to the ridicule of poster But it was not that way T teaching was heard, cherish passed on. And the original reas for this was that the first peo who heard him talking knew th he had hammered all this out the anvil of his own living Th knew that he knew God and kn men, and he spoke out of know edge, not by guesswork.

So that the church accepts h joyfully to this day not as one wh had been taught to say a piece a said it—this is not what he mea by saying he spoke only the wor of the Father. Christ was mo than a recording tape. He was faithful Son who had learned in h Father's school.

Peace Corps

Senator Harrison A. Williams, Jr, of New Jersey is one of the prime movers in a proposal to recruit a civilian Peace Corps of young American dedicated to working for peace

The Corps would, in effect, be a Foreign Legion of young people armed with ideas and ideals, rather than guns, to become people-to-people ambassadors in the underdeveloped nations of the world

"If I am not mistaken," Sen Williams said, "the United States is going to take a growing people-to-people interest in the programs to be developed to help Asia, Africa and Latin America—in particular—to become more self-sufficient and secure."

Sen Williams has made numerous speeches in support of a Peace Corps to be composed of young men and women of outstandng qualities who would work directly with the people in underdeveloped nations for a period of three years

Volunteer Ambassadors

The proposed Corps, on which President Kennedy has commented favorably, would be recruited from among qualified volunteers, principally young college and university graduates

Those accepted would receive six months training in the language, special skills, needs and customs of the countries in which they are to live and work with the people.

The proposal, Sen. Williams said, is "gaining momentum like a snowball" Women students at Mount Holyoke College, where he spoke, were enthusiastic and eager to enlist Volunteer units also have been formed at Princeton and Rutgers universities.

"Supreme Court Justice William O Douglas once said America should export tens of thousands of volunteer workers for peace—men and women with an almost missionary zeal to be of service" Sen. Williams said

"The spirit of which he speaks is already very much in evidence at our universities; it needs only intelligent direction and a well-considered program to be put to effective work," he said.

Communist Lead

The Peace Corps idea focuses attention on a phase of the cold war too long neglected by the Free World. Communist infiltrations, es-

Now Is The Time . . .

BY MAX SMITH

TO GIVE BULK MILK TANK SPECIAL CARE—Many dairymen have made a recent investment in a bulk milk tank, more dairymen will no doubt face this investment in the near future. Any piece of equipment must be properly managed in order to perform the intended purpose A recent publication from Penn State University titled, "Tips for Farm Bulk Milk Tank Owners" is full of practical suggestions. A supply is on hand at our Extension Office.

TO KEEP ACCURATE FARM RECORDS—There is little doubt of the great value of an accurate set of farm records Here at the beginning of a new year we urge all farmers to adopt some recording system These records are expected by many government agencies and should be of great value in analyzing the farm business.

TO CHECK WITH SOCIAL SECURITY OFFICE—We are informed of a number of changes in the Social Security law that may be of interest to farmers; these relate to severely disabled, working time to be eligible, family employment, and acceptance of individuals in a non-profit organization We suggest that interested farmers check at Social Security headquarters, West Chestnut St, Lancaster

TO SERVICE FARM MACHINERY—The more severe winter this year might mean an earlier spring than last year the repair and servicing of farm machinery now will prevent delays later. Many farm equipment dealers will give special service if the work is to be done during the winter months. If working conditions permit on the farm, now is the time to prepare for the field work by having all machinery in good condition.

Research Seeks Better Alfalfa

Alfalfa seedlings are under scrutiny for varietal differences at the Agricultural Experiment Station, the Pennsylvania State University All alfalfa seed look alike, Guy W. McKee superintendent of the Station Seed Service comments, but plants of certain varieties have measurable and observable differences

Much alfalfa seed is sold under variety names but is not Certified. If particular varieties or mixtures could be recognized while growing in the field much misunderstanding and some times downright deception could be prevented, he believes. Certified seed is best because it must come from a field that has been inspected by disinterested officials, in Pennsylvania supplied by the State Dept of Agriculture.

The value of improved forage crop varieties may be largely lost if varietal mixmixture and hybridization are not controlled, Dr. McKee emphasizes Field trials, such as those under way with alfalfa, are necessary to verify evaluations made in laboratories, greenhouses, and growth chambers Seedling plants of some alfalfa varieties are recognizable while quite small, he points out Others must be allowed to flower before indentfication can be positive.

Dr McKee's work in alfalfa identification is part of a project in which scientists at the New York, Rhode Island, Maryland, and Maine stations are cooperating. Varieties under study include Vernal, Narragansett, DuPuits, and Williamsburg

Comparable observations of flower color, time of flowering, plant type, height, leaf color, coarseness of stem, disease infestation, spring vigor, and fall dormancy will be made. In a fall management experiment, effects of three cutting dates, Sept. 15 22 and 29, will be compared under varying climatic con ditions.

Elmstone Major's Mary Rose, a ten-year-old Ayrshire cow owned by Masonic Farm Elizabethown, has a record of 12,465 lbs milk and 518 lbs butterfat on 2x, 305 days

---

If we got everything we wanted, we wouldn't like what we had.

Use Superior Sires
Don't Cull Low Producers

The value of superior progeny- tested bulls in raising dairy herd production is demonstrated by a recently completed 35-year Holstein-Friesian breeding experiment, the U. S Department of Agriculture reports.

Experiment records indicate that production by the progeny of low-producing dairy cows will rise to the herd average in a few generations if good transmitting sires are used On the basis of this finding, Milton H Fohrman, leader of the trials at USDA's Agricultural Research Center, Beltsville, Md, advises dairymen to save the daughters of low-producing cows, if the herd sires used are production proved. No important benefit to herd production seems to result from culling these daughters, he says, although it is wise to cull their low-producing mothers.

This long-term experiment covered eight generations of un-culled, unselected cows Only sires were selected. All heifers were raised and developed, regardless of their appearance or producing ability. They were housed, fed, and managed uniformly during the entire test period.

Use of proven sires resulted in rapid improvement in butterfat production (the basis of comparison in this herd) for the first five generations. The herd's yearly fat production increased from an average of 530 lbs. per cow to 703 lbs in the first five generations, but increased to only 711 lbs. in the last three generations.

Transmission of production characteristics from dam to daughter is not always consistent, test records showed. Even when using proved bulls, the highest producing cows do not always have the highest producing daughters. In the experiments only 15 per cent of the daughters attained the same production class as their dams. There were 193 daughters of cows that produced more than 650 pounds of butterfat each during their best production year. These daughters ranged in production from 200 to 900 pounds, with an average of 693 pounds. The 194 daughters of cows that produced less than 650 pounds of butterfat ranged in production from 200 to 900 pounds in their best year, with a group average of 617 pounds.

An estimate was made of the herd production that would have been possible if low-producing cows and their decendants had been culled. Twenty-one cows produced less than 425 pounds of butterfat during their best years Culling all their daughters would have removed 176 cows that averaged 661 lbs. of fat. The 215 cows that would have remained in the herd averaged 651 lbs. of fat. The theoretically - culled herd actually outproduced the remaining herd, demonstrating again that heifer selection is not very effective when based on the level of dam production.

The Beltsville Holsteins are now among the highest producing unculled cows in the world. New experiments are underway at Beltsville to see if further improvement in herd production is possible. A search is being made also for breeding methods that will increase their production.

Some of the cows are being mated to the very best Holstein proved sires in the US and Canada through artificial insemination. Formerly, the herd sires were limited to bulls at the Agricultural Research Center or in nearby artificial insemination organizations. By searching over most of North America for sires, the USDA scientists hope to find some whose genes will amplify the production characteristics of the herd

Another new experiment involves the use of the best sires of other dairy breeds to find out if cross-breeding will increase production in the herd. Still another experiment involves use of selected progeny-tested bulls, which are off-spring of the Beltsville cows. In these experiments, production comparisons will be made on the basis of whole milk rather than butterfat production.

The Art Of Salad Making

by Mrs. Richard C. Spence

A main dish salad is a meal in itself—hearty and nutritious Such a salad is usually built around meat, fish, eggs, or cheese in combination with salad greens and a zesty dressing. However, a light main course salad may be just a generous serving of canned fruit topped with cottage cheese or sherbet. Menus featuring main dish salads may be planned for luncheon, supper, or dinner.

MAIN DISH SALADS

They're perfect for spur-of-the moment meals too, since preparation and service are so easy. A general pattern for a main dish salad goes like this hot soup, the salad of your choice, a bread accompaniment, dessert, and beverage

Because canned meats are so often used for main dish salads, remember these tips. For easy slicing of canned meats, chill well, remove both ends from the can, push the contents out in one piece and slice as desired Canned meats may be cut several hours ahead of serving if the slices are tightly wrapped and refrigerated Cube, sliver, or slice these meats and add to tossed green salads, potato, macaroni, or cabbage salads.

Serve muffins, biscuits, or yeast breads often, using a packaged mix as a time-saver. Vary bakery hard rolls and French bread with garlic butter, a topping of grated cheese, or a sprinkling of poppy seeds

SALMON 'N FRUIT LUNCHEON PLATE

SALMON SALAD. Combine the following: One 1-lb. can salmon, drained and flaked; ½ cup each, chopped celery and sweet pickles; 2 tablespoons chopped green pepper, ½ teaspoon salt, 1 tablespoon lemon juice, and ⅓ cup mayonnaise. Chill. 4 servings.

MOLDED PEARS: Dissolve 1 package lime-flavored gelatin in 1 cup hot water; add 1 cup gingerale Chill until slightly thickened Arrange pear halves, cut side up, in rows in a flat pan Pour in gelatin; chill until firm Cut so each piece contains a pear half.

Arrange a generous serving of Salmon Salad and a Molded Pear in lettuce cups Garnish with potato chips, pickle fans, and watercress.

SPECIAL OCCASION MEAT PLATTER

DEBILED HAM MOUSSE: Soften 1 envelope unflavored gelatin in ¼ cup cold water; dissolve over hot water. Blend ¾ cup mayonnaise with 2 3-ounce cans deviled ham, 1½ teaspoons grated onion, ½ cup chopped celery, ery, ¼ cup chopped green pepper, and ¼ cup chopped sweet pickles. Pour mixture into a pint mold; chill until firm.

Unmold Deviled Ham Mousse in the center of a large serving plate; surround with water cress. Arrange slices of canned corned beef and pairs of Vienna sausage around the Mousse. Serve with iced pineapple juice.

TOMATO ASPIC WITH CABBAGE SLAW

TOMATO JUICE ASPIC: (For an eight-inch ring mold make three times this basic tomato juice aspic recipe). Soften 1 envelope unflavored gelatin in ¼ cup cold tomato juice Heat -¾ cups tomato juice to a boil. Add 1 teaspoon grated onion, 1 teaspoon salt, & softened gelatin, stirring until the gelatin is dissolved. Pour into individual molds and chill until firm. 4 servings

Unmold a Tomato Juice Aspic Ring on a serving plate. Fill the center with cabbage slaw to which corned beef, cut in cubes, has been added Garnish with salad greens Other fillings are cottage cheese, potato salad, egg, chicken, or salmon salad

VIENNA'D MACARONI SALAD

VIENNA'D MACARONI SALAD: Cook 1 8-oz. package elbow macaroni just until tender. Drain, blanch in cold water, and drain thoroughly. Combine with 1 cup chopped celery, 1 cup chopped sweet pckles, 2 tablespoons grated onion, and 1 can Vienna sausage cut into thin slices Blend 1 cup mayonnaise with 2 tablespoons juice from pickles, 1 teaspoon salt, and ¼ teaspoon pepper. Add to macaroni mixture. Chill. 6 servings.

Heap Vienna'd Macaroni Salad on salad greens in the center of a large serving plate. "Spoke" Vienna sausages over the top. Arrange halves of deviled eggs around the salad.

* * *

ACCOMPANIMENT SALADS

Accompaniment salads. eaten with the main course, are probably the most popular and most often served of all salads. Sometimes an accompaniment salad is used to garnish a main course serving platter; occasionally it is served as a first course appetizer. All of these salads are made in small to middle-sized portions, and keyed in flavor, color, and texture to the rest of the menu. They are easily varied by the dressing, topping or garnish, thus may be adapted to many luncheon, dinner, or supper menus.

Accompaniment salads may be served several ways. Crisp tossed salads or canned fruit or vegetable arrangements garnished with salad greens are attractively served from a large salad bowl Individual salads arranged on greens on a single large platter may be passed. A small salad for each person helps make an attractive place setting. Arrange on small side plates or in little wooden or pottery bowls and place to the left of the dinner plate.

Bread sticks or appetizer crackers are especially good when the salad is served at the beginning of the meal Assorted breads, quick hot breads, or dinner rolls are eaten when the salad is served with the main course.

ACCOMPANIMENT SALAD SUGGESTIONS

Pineapple slices topped with sliced and scored bananas and peanuts.

Peach halves topped with cottage sheese and chopped chives or onion

Pear halves put together with cream cheese and topped with watercress.

Apricot halves topped with softened cream cheese and chopped dates.

Canned peas combined with sliced celery, cheese

cubes, and French dressing.

Asparagus spears marinated in French dressing and garnished with tomatoes.

Green beans marinated in French dressing & garnished with egg slices.

Sliced beets marinated in French dressing and garnished with onion rings.

Dress up a canned fruit salad with pineapple chunks—lift them out of the can, wet with syrup, and dip into chopped nuts.

Roll balls of cream cheese in slivered toasted almonds, chopped pecans, or plain or toasted cocoanut for a fruit salad topping:

To prevent apple or banana slices from darkening dip in pineapple syrup or juice.

Use whole spiced peaches or apricots, adding a leaf of watercress for a stem, to garnish canned meat platters.

Serve tomato juice aspic molds in crisp lettuce cups as a colorful addition to a canned meat arrangement.

Use pimiento strips, thin slivers of cheese, slices of stuffed olives, or sieved hard-cooked egg yolk to garnish vegetable salads.

CRUSHED PINEAPPLE MOLD

Dissolve 1 package lemon-flavored gelatin in two cups hot water. Chill until slightly thickened. Fold in ½ cup drained crushed pineapple and 1 cup diced unpeeled red apple. (½ cup chopped pecans or walnuts may be added.) Mold as desired; chill until firm. Unmold on salad greens 5 to 6 servings.

MOLDED GARDEN VEGETABLE

Dissolve 1 package lemon may be served as a dessert • flavored gelatin in 1¾ cups h. water. Add ½ teaspoon salt, 2 teaspoons grated onion, and 1 tablespoon vinegar. Chill until slightly thickened Drain one No. 3 can mixed garden vegetables Carefully fold the vegetables and ½ cup chopped celery into gelatin. Mold as desired; chill until firm. Unmold on salad greens. 5 to 6 servings.

* * *

DESSERT & PARTY SALADS

Colorful canned fruit arrangements, lovely gelatin molds, and unusual frozen fruit salads—these are your special occasion salads. They after a meal, or alone as a party refreshment. Occasionally they are served as an accompaniment salad The gelatin and frozen types are especially suitable for entertaining menus when so much of the food preparation must be done well in advnce.

Your own collection of serving trays and platters will determine the size of the fruit salad arrangement. It's easy to place canned fruits attractively on any shape plate, and combine them with a pretty and suitable garnish. When large gelatin ring molds are used, a bowl of mayonnaise fills the center nicely. Frozen fruit salads are usually made in refrigerator freezing trays or loaf pans and cut in slices to serve

Bread accompaniments may be as varied as the salads, with the following topping the list of favorites; tiny sweet rolls, cinnamon toast, and fancy party sandwiches.

FROZEN FRUIT SALAD

1 no. 2½ can fruit cocktail
1 teaspoon unflavored gelatin.
2 tablespoons lemon juice
1 3-oz. pack cream cheese
¼ cup mayonnaise
Dash salt
⅔ cup whipping cream, chilled
½ cup sugar
½ cup chopped nuts

Drain fruit cocktail. Soften gelatin in lemon juice, then dissolve over hot water Blend cream cheese with mayonnaise and salt. Stir in gelatin Whip cream until stiff, adding sugar gradually during last stages of beating Fold in cheese mixture, nuts, and fruit cocktail. Pour into refrigerator tray that has been lined with waxed paper Freeze until firm with refrigerator set at coldest setting (approximately 4 hours). Turn out on platter, remove paper, cut into thick slices. Garnish with watercress. 8 servings

NOTE: Let the salad stand at room temperature for a few minutes just before serving. The flavor and texture are ever so much better.

FRUIT GELATIN RING MOLD

2 packages lemon-flavored gelatin
1½ cups hot water
2 cups fruit syrup (drained from pueaches and pineapple)
Canned peach halves, drained
Canned pineapple slices, drained
Canned dark sweet cherries, drained
Salad greens

Dissolve gelatin in hot water Add fruit syrup and chill mixture until slightly thickened. Pour ½ cup gelatin into the bottom of an 8-inch ring mold (1½ quarts) and chill until almost firm. Set pineapple slices in gelatin with a dark sweet cherry in the center and pour in gelatin just to cover Chill until firm Stand peach halves upright against sides of mold and place cherries above pineapple slices Pour in gelatin to cover peaches about one-half and chill until firm Add remaining gelatin

Youthpower

Good Diet Leads To Good Health

By: Saralee Bradley

Editor's Note: As an active member in the Lancaster County 4-H cooking club, Miss Bradley knows the value of food in producing Youthpower. The following was written to express her view of the role of adequate diet in the life of an active youth.

Good health is the necessary base on which you can build a happy life. But, good health is dependent on an adequate diet.

An adequate diet is the selection of foods that together contain enough of each necessary nutrient to meet the needs of the body. It also contains enough energy material to give energy for the work the body must do

Foods can be combined in many ways for the right diet The problem is to find a plan for everyday use that we know the diet is adequate

To be adequate a diet should include the six nutrient factors; protein, calcium, vitamin A, thiamine, riboflavin, and ascorbic acid.

All foods are good, but diets require a variety of foods if we are to supply all the material the body needs

The body needs a certain amount of energy for normal body activity, to this must be added enough energy for conscious physical activity. This energy must be obtained from proper foods or body tissues must be burned to supply it. Under normal conditions food should supply the daily needs for energy.

An adequate diet must contain milk or milk products in some form. By many authorities milk is considered the most important and complete food. It is an excellent source of riboflavin and calcium hence the diet containing milk and milk products produces both stronger bones and surdier teeth as well as muscles and energy.

School children have been tested on the basis of diet; and those having followed diets meeting health requirements have been found to have better, cleared mental ability and ranked higher on tests than those suffering from malnutrition

Follow the successful athlete, for instance, our wrestlers or basketball players, and ascertain their diets you will then see the benefits of an adequate diet.

Greater resistance to disease is prevalent among those who are properly fed The body must possess a certain stamina and be fortified with plenty of body soldiers, if it is to withstand the many disease germs prevalent in overcrowded buildings and other sources of contact. By building up bodily resistance you can reduce your susceptibility.

For the proper nourishment of every organ in your body and building resistance to infection, the blood stream must contain an adequate daily supply of nutrients. Protein is important for this as are vitamins A and C.

Adequate diet can prevent diseases such as anemia, nervousness, and mental disturbances.

The problem of preventing vericose vein becomes one of maintaining health muscles. Since muscles are made of protein, they can maintain their strength only by generous amounts of adequate proteins in the diet

If the daily diet is planned adequately so as to supply all the vital nutrients of calcium, phosphorus, proteins, vitamins D and C, there need be no fear of broken bones at any age nor question of delayed healing should broken bones occur. Often we say, "It's old age" when really the diet is at fault.

Diets rich in hormore producing vitamins protect our lifegiving and life sustaining glands.

Diet can make you beautiful. Proper diet prevents wrinkling of the skin, sagging muscles; produces hair that is alive and shining and nails that resist breakage.

Dr. Wilder of the Mayo Clinic has predicted a world of the future in which no one will need to wear glasses, farsightedness will be delayed and cataracts can even be prevented. All this will be accomplished if we apply our present knowledge of nutrition.

So we see the benefits of an adequate diet are innumerable. We must make up our minds to follow such diets and thus achieve the energy, vitality and good health that will enable us to live longer and enjoy it.

Trout Spring Sov Duane Pontiac 3765472 owned by John E. Kreider, Lancaster, produced 14,812 lbs milk and 567 lbs. butterfat in 365 days on twice daily milking as a 5-year-old.

pecially among student groups, have poisoned the minds of many people against the United States.

"We know in our hearts," Sen. Williams said, "that America is deeply concerned about the fate of all free nations. But have we persuaded people in those nations that we are really working for grassroots progress in their nation?"

The Peace Corps proposal is an encouraging sign that the United States is at last beginning to recognize that dollars alone cannot buy friendship abroad; that it must be founded on mutual respect and understanding

People who won't stand on their own two feet shouldn't complain when others do.

Crossbred Pigs Outgain Others, Tests Prove

Two-, three-, and four-breed cross litters were 13% 34% and 20% larger, respectively, at market time, than straightbred litters.

University of Tennessee animal scientists Smith, Moorman, and McLaren, made this report of one result of an experiment to more than 2000 fellow scientists gathered in Chicago, Nov. 25-26, 1960, for the 52nd annual meeting of the American Society of Animal Production.

In the experiment, the performances of straightbred Durocs, Hampshire, Poland, and Landrace, the crossbred litters were studied to compare the productivity of the straightbreds with various two-, three-, and four-breed crosses among the straightbreds.

Records were made of litter size, weight per pig and weight per litter at birth, 56 days, 154 days and 180 days.

In addition, daily gain from birth to market was used as a basis of comparison. Pork backfat measurement was made at 200 pound weight of each hog.

Two- and three-breed crossbred sows farrowed 9% and 11% more pigs than the straightbred sows. Crossbred pigs were superior in litter size at all ages.

Comparing the two-breed cross with the straightbred litters, it appeared that the two-breed cross litters survived better, while the advantage of the three-, and four-breed cross litters reflected greater litter size at birth and greater survival ability.

Other conclusions were that crossbred pigs gained faster from birth to market than straightbred pigs.

Crossbred litters were scientifically heavier than straightbred litters at 154 and 180 days.

This reflected the effects of both greater survival and growth ability in the crossbred litters.

VITAMIN PILLS

Taking vitamin pills regularly doesn't assure you of being well-nourished. Vitamin pills are expensive, and are a poor substitute for a good diet. Penn State extension nutrition specialists points out that a haphazard diet bolstered by vitamin concentrates may be lacking in calories, protein, minerals, or in some vitamins yet unknown. However, vitamin pills are valuable in infant feeding, in cases of inadequate diets, or of increased needs.

The Agricultural Extension service was established in 1914 with the passage of the Smith-Lever act.

600 pounds of PIONEER "DRY AND FRESHENING" yields an EXTRA TON of milk!

BEFORE CALVING
This cow was fitted on Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD
The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk.

60 DAYS ON PIONEER DRY AND FRESHENING WILL IMPROVE PROFITABILITY OF YOUR HERD

PIONEER DRY AND FRESHENING *DELIVERS*

- Up to 25% more milk
- Higher breeding efficiency
- Strong, vigorous calves
- Ease in calving
- Quick elimination of placenta
- Less udder congestion
- Better herd health

Calving stimulates a cow to produce far beyond her ability to convert feed into milk. So, during the first months of her lactation, she "steals" milk-making nutrients from her body.

It requires only 600 pounds of Pioneer Dry and Freshening feed to repair the body tissue used during the previous lactation . . . to build a reserve of body condition for the next lactation . . . and to produce a vigorous calf.

Pioneer Dry and Fresh, fed during the dry period, is a sound investment in herd health, sustained high production, and longevity for your producing herd.

Glenn Herr Joins Feed Firm

Glenn Herr, Manheim R1, has joined the sales and service staff of Miller and Bushong, the Rohrerstown feed firm

Until recently Herr operated a feed business at Manheim R1. He has long been active in poultry circles in the county in various capacities He is sale manager of the Lancaster County Poultry Exchange.

GLENN HERR

Herr is married to the former Ruth Jurell. The couple has three sons.

RULES FOR CHILDREN

Children need rules to live by, says Mrs. Marguerite Duvall, Penn Stte extension family life specialist. They need limits, and they need to consider other people's rights and feelings, too. Rules help children know what to expect A child will have more respect for you and also for himself if he is helped gently but firmly to do the things he should.

Horns Are Useless

Dairymen Urged To Dehorn Calves

In our opinion, at the moment, there's nothing quite as important in management of a Guernsey herd as systematic dehorning of all calves! !

In fact, during the winter months when you have many dry cows with horns, it pays you to take care of them as well.

There are relatively few herds in the country that still have cows with horns. Buyers in many cases absolutely refuse to bid on cows with horns.

Recently, we had a man who was interested to buy an entire milking herd and probably would have paid the asking price of $450 a piece However, when he walked in the barn and saw the horns he wouldn't consider them at any price! It didn't do any good to argue that these cows were gentle and horns didn't bother, the man simply lost the sale. He was then forced because of illness to offer them at public auction and for the same reason he didn't get the value for the cows to which he was entitled.

Don't be old-fashioned — be in step with the times— MAKE MONEY— DEHORN!! You will find out that even if you don't consider to sell, your management problems will be lessened. - Golden Guernsey News.

Penn Del Kings Bessie, a senior two-year-old Guernsey owned by R F. & L. A Witmer, produced 10,350 pounds of milk and 579 pounds of fat in 305 days. She was milked two times daily.

Consumer prices will be about the same in 1961 as in 1960.

Penn_Dell Drucilla Snow White, a junior four-year-old Guernsey, owned by R. F. & L. A. Witmer, Willow Street produced 11,180 pounds of milk and 592 pounds of fat in 302 days. She was milked two times daily.

M. H.Lindy 7th Mitzie, a seven-year-old registered Ayrshire cow owned by Masonic Farms, Elizabethtown has recently completed an official record of 14,863 pounds of milk and 606 pounds of butterfat while milked but twice daily for 305 days.

Milk Dealers Seeking Price Cut On Milk To Be Sold Out Of State

The Lancaster County Milk Dealers Association this week asked the Pennsylvania Milk Control Commission for a lower minimum they must pay farmers for bottled milk to be sold out of state.

A. J. Nixon, director of milk procurement for Penn Dairies told the commissioners in a hearing Tuesday that Lancaster county dealers cannot compete with out of state dealers at the present price.

Under a 1956 commission order, the price of Lancaster County milk varies seasonally from $5.65 per hundredweight to about $5.85 per hundredweight as fluid milk at farms.

Dealers pointed out that in some areas of Maryland and Delaware where Lancaster County dealers sell some of their milk, local dealers must pay lower federal minimums or are not regulated at all.

Local dealers contend that they can not compete in interstate markets because their initial costs are higher than their competitors' costs.

Nixon pointed out York County dealers last year were granted a minimum reduction similar to the one the Lancaster dealers are asking.

Some of the York dealers are competitors to the Lancaster dealers in the interstate market, he added.

Nixon asked that the same minimum apply to them as now applies to the York area.

That is, prices for all fluid milk bought, bottled or packaged in Pennsylvania, but sold outside the state, be "the producer prices for milk prevailing in the market or area in which the milk is ultimately sold."

Under the proposed amendment the commission would announce prices monthly on the fifth day, determined on data concerning prices in the affected market area, compiled by the commission or submitted to it from other public agencies.

Dealers would notify the commission on the 25th day of the preceeding month as to whether they intend to sell in a particular market area and in which area.

Nixon said, "commission approval of the proposed amendment to the area 14 pricing order will not adversley affect payments to Pennsylvania producers."

USDA Moves To Increase Food Program

Secretary of Agriculture Orville L. Freeman moved this week to expand the variety of foods to be distributed to needy families in the nation.

The Department announced purchase programs for canned pork and gravy, dried edible pea beans and whole dried egg solids.

The purchase programs announced today will be carried out with Section 32 funds which are made available to the Secretary and provide authority for the distribution of foods to needy persons.

"Under this new order," Secretary Freeman said, "we are providing essential food for those who need it and at the same time assisting American farmers by action that will help to decrease our agricultural surplus."

The proposed purchases will add a significant amount of protein foods, thus supplying the most essential nutritional element needed by approximately 3.5 million persons in 42 States, who now receive flour, cornmeal, nonfat dried milk, rice, lard and butter. Distribution rates are established in such amounts as can be properly utilized so as to avoid waste or misuse.

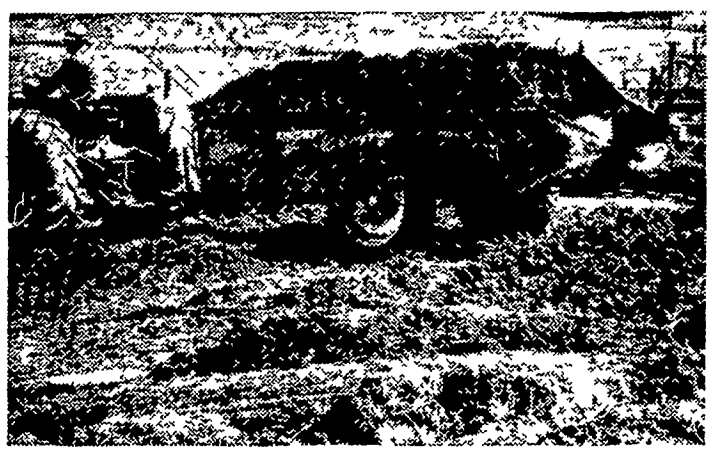
Foods made available to the States under the USDA's food distribution program are delivered in carlot quantities to points designated by the State agencies. The State agencies assume responsibility for properly storing, handling and distributing, determining eligibility of recipients, and program supervision.

Foods purchased under the program will be available to States by late February or early March.

Liquid manure is not a problem on the John Eby farm at Gordonville R1. Eby has a system of terra-cotta drains under the floor of his hog pens. Liquid manure from the pens drains into a cistern where it is stored until it is to be spread on the field. An auger, similar to a grain auger, lifts the manure into the tank trailer. In the field, gravity unloads the liquid and a board baffle spreads it evenly. —L. F. Photo

NEW

95-BUSHEL SPREADER...



made with a LASTING difference

Heap high the loads and spread 'em fast with the new Allis-Chalmers 95-bushel, ground-drive spreader. It's made to *last* in places where spreaders usually wear out first.

Special acid-resistant steel is used wherever damage might occur. Steel pintle drive chain comes as regular equipment. Treated tongue-in-groove lumber on a bridge-type frame resists warp and rot, stays tight for longer life. Heavy-duty axle carries heavy loads without twisting or bending on rough or frozen fields.

Come in today to see how this new Allis-Chalmers spreader will last and last... for you.

Ask us about the Allis-Chalmers plan to finance your time purchase of farm equipment.

DO YOUR BROOD SOWS NEED HELP?

Most sows do not give enough milk beyond the 5th week of lactation to meet the requirements of large litters.

TRY OUR—

No. 12 Green Pastures Pig Starter Pellets!

HOW TO USE:—

Start Creep feeding No. 12 when pigs weigh 5 lb. or are 7 days old and feed through 6th week when pigs should weigh about 35 lbs.

AMOUNT REQUIRED

15 to 20 lbs. per pig.

FEED PER LBS. OF GAIN DURING THIS PERIOD

1.25 to 1.50 lbs.

FIELD TESTS INDICATE:—

1. More uniformity in pigs, fewer runts.
2. More economical gains. Heavier pigs at 8 weeks.
3. Pigs may be weaned at six weeks. This gives more time for proper conditioning of sow before re-breeding.
4. Easier to maintain farrowing schedule.

MOST PALATABLE FEED WE HAVE
"Sweet as a good muffin"
